Profile

Final-year Computer Science (Honours) student at Asia Pacific University, specialising in full-stack and front-end development. Experienced in building web applications, blockchain-based systems, and data-driven platforms across academic and real-world projects. Currently developing a personalised learning resource recommender system as a Final Year Project, applying machine learning and API integration. Fluent in Arabic and English, with a track record of delivering technical work in team environments.

Skills

- Languages & Frameworks: Python, Java, C, C++, JavaScript, TypeScript, HTML & CSS, Solidity, React, Angular, Flask, Rust (basics)
- Databases & Tools: SQLite, REST APIs, Git & GitHub
- Concepts: Object-Oriented Programming, Data Structures & Algorithms, Concurrent Programming, Blockchain Fundamentals, Software Development Lifecycle (SDLC), Responsive UI Design

Projects

- **Personalised Learning Resource Recommender System (FYP — In Progress, 2025–2026):** A web-based platform that aggregates courses from Coursera and Khan Academy and delivers personalised recommendations using a hybrid approach combining TF-IDF, cosine similarity, and collaborative filtering via matrix factorization.)
- **Wood Furniture Supply Chain DApp (Blockchain Development — Group Project):** A decentralised application built on blockchain to track wood furniture from timber sourcing through manufacturing and retail, providing full supply chain transparency. Built with TypeScript, Solidity, and JavaScript.
- **Sheba — Hotel Management System (C, Python):** A role-based hotel management system handling administrator, staff, and customer functionalities including room management, user registration, and account control.
- **APU Cafe Management System (Python):** A Python-based cafe management system supporting multiple user roles including administrator, staff, and customer, developed as a group project.
- **Food Delivery & Management System (Java):** A comprehensive platform managing food delivery, takeaway, and dine-in services across multiple roles — vendors, customers, delivery couriers, admins, and managers — with a defined order status flow.

Education

Bachelor of Computer Science (Honours)

Asia Pacific University of Technology and Innovation (APU)

Expected Graduation: September 2026 | CGPA: 3.33

Experience

Awam Foundation for Culture and Development

Technical Support Assistant

OCT 2020 – OCT 2023

- Provided comprehensive technical support to resolve hardware and software issues for company staff.
- Supported employees in configuring and maintaining remote work setups, ensuring secure and efficient workflows.
- Assisted in writing research reports and documentation, contributing to project accuracy and clarity.
- Translated technical documents and correspondence to support effective communication across teams.

SL Cargo SDN. BHD.

Internship Trainee for Operations & Administration Division

SEPT 2025 - JAN 2026

- Assisted in daily logistics and freight-forwarding operations, including shipment tracking and documentation handling.
- Supported office operations by organizing data, updating records, and preparing reports using Microsoft Excel and Google Sheets.
- Helped improve internal workflows by researching digital tools and automation ideas for tracking and record management.
- Coordinated with staff to ensure accurate handling of customer information and shipment details.
- Gained practical exposure to supply chain operations, logistics documentation, and real-world business systems.

Languages

- **Arabic – Fluent**

Arabic my mother tongue, which I speak natively in daily life and professional contexts.

- **English – Advanced**

Studied English since 1st grade and completed the IELTS exam, demonstrating strong reading, writing, listening, and speaking skills.
